EDUCATION

University of Chicago

B.S. in Computational and Applied Mathematics & Economics | GPA: 3.71/4.0

Chicago, IL

Expected June 2028

- Financial Markets Program: selective three-year program building quantitative finance acumen through weekly workshops, personalized advising, employer visits, and coursework at UChicago Booth
- Relevant Coursework: Real & Complex Analysis, Mathematical Probability, Statistics, Linear Algebra

TRADING EXPERIENCE

Green Venturaa Capital

Incoming Quantitative Trading Intern — Futures and Equities

Bradenton, FL

June 2026 – Present

- Developed quantitative macro signals and systematic backtesting infrastructure for futures and equity portfolios, utilizing ML and alternative data pipelines to identify statistical arbitrage opportunities and model multi-strategy risk parameters

UChicago Algorithmic Trading Competition

Team Captain

Chicago, IL

Jan 2026 – Apr 2026

- Captained a team building and trading quantitative models for multi-asset strategies (equities, options, ETFs, prediction markets) on a live simulated exchange, running fair value estimation, statistical arbitrage, and real-time market making

QUANTITATIVE RESEARCH (TRADING SIGNALS & STRATEGY)

Federal Reserve Communication Research

Mentored by Jusvin Dhillon — AQR, Tudor Investment Corp.

Greenwich, CT

May 2026 – Present

- Built a continuous hawkish/dovish trading signal from Fed statements (1997–2026) using a dual NLP pipeline (Loughran-McDonald dictionary + LLM scoring), Python (BeautifulSoup, Pandas)
- Tested the signal's market-timing value with AR(1) surprise measures and HC3 robust-SE regressions against Treasury yields and equities (train 1997–2015, test 2016–2026); surprise-based signal predicted 2Y yield moves out-of-sample ($t = 1.94$), beating the dictionary-only baseline ($t < 1$)
- Currently implementing ChronoGPT and other chronologically consistent LLMs; co-authoring a paper on the findings

Lehigh University — Masters in Financial Engineering Dept.

Quantitative Research Analyst

Lehigh, PA

Sep 2024 – May 2025

- Designed and backtested a trading strategy across flexible portfolios to quantify the alpha cost of interpretability gains, combining 10-K fundamental signals (Profit Margin, Risk-Free Rate, Total Invested Capital, Net Receivables, ROIC, COGS) with pricing data via marginal analysis and Python multithreading

Options Trading Research — Carnegie Mellon University

Supervised by Dr. Michael Stanley

Pittsburgh, PA

Mar 2023 – May 2023

- Designed and backtested an options trading strategy in Python using linear programming on 20 years of SPY options data; selected as 1 of top 7 from 200+ applicants to present at symposium

ADDITIONAL EXPERIENCE

Sway

Business Development Intern

San Francisco, CA

June 2025 – Aug 2025

- Designed and tested business model variations for venue monetization, evaluating partnerships, pricing structures, and ROI; applied data-driven targeting to improve lead conversion and scalability
- First freshman selected into Lehigh's most competitive research internship, typically reserved for seniors and master's students

Startup Factory Hub

Investments Intern

Orlando, FL

Jan 2025 – May 2025

- Built financial models and comparable transaction analyses to inform investment memos across aerospace, AI, and hardware; recruited 10 startups and managed labs at 3 colleges

Galaxy FinX Bank

Cryptocurrency Investments Intern

Remote

Sep 2023 – Jan 2024

- Researched tokenized assets and ICO trends to support fundraising strategy; delivered weekly board presentations

PROJECTS

Overwatch Rice Purity Test

Independent Project

Remote

June 2025 – Aug 2025

- Built and scaled a custom web app (Python, HTML) to 30,000 users in 24 hours and 100,000 in 2 weeks; now at 500,000+ lifetime users and 2M+ views, broadcast live during streams and community events

SKILLS & INTERESTS

- Technical: Python (NumPy, Pandas, BeautifulSoup), R | GitHub: github.com/Vedjannu | Interests: Poker, BJJ, Monopoly
